Dear Hiring Manager,

I am writing to express my interest in the Software Engineer (Full Stack Developer) position at your organization. I am a Computer Science Engineering student with a strong interest in software development, problem-solving, and building practical applications. I am eager to apply my technical knowledge and project experience in a professional environment.

I have hands-on experience with C++, JavaScript, TypeScript, React.js, Node.js, Express.js, HTML, CSS, MySQL, REST APIs, Git, and Postman. I have worked on projects including an E-commerce Website, Library Management System, Weather Forecasting Application, and Face Recognition AI application. In addition, I have explored projects involving microcontrollers and sensor-based systems, database management using NASA Kepler mission data, and a coffee shop application featuring location mapping and a delivery system developed using a monolithic architecture. These projects have helped me gain practical exposure to frontend and backend development, databases, APIs, system architecture, and application development.

Along with my development skills, I have been strengthening my knowledge of Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, and Object-Oriented Programming. I enjoy learning new technologies, solving technical problems, and turning ideas into functional applications. As a fresher, I am particularly motivated to learn from experienced professionals and contribute effectively to a development team.

I would welcome the opportunity to contribute to your organization and grow as a Software Engineer. Thank you for considering my application. I look forward to the opportunity to discuss my skills and candidature with you.

Sincerely,

Hariom Sharma
