HARIOM SHARMA

Software Development & Implementation Candidate

+91 9103745223 | harimagotra909@gmail.com | linkedin.com/in/hariom-sharma | github.com/harisharma | leetcode.com/u/SRADeOXzt | Portfolio: https://github.com/harishrarma/PORTFOLIO

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, system integration, and cloud concepts. Skilled in building practical software solutions using the MERN stack, SQL databases, and REST APIs. Familiar with System Design Level 2 concepts, including scalable components, service interactions, and basic architecture planning. Strong in problem-solving, technical troubleshooting, and end-to-end project implementation, with an interest in Software Development, Implementation, and Customer Success roles.

TECHNICAL & CORE COMPETENCIES

- **Programming Languages:** C++, Java, JavaScript, Python, HTML5, CSS3.
- **Frameworks & Web:** React.js, Node.js, Express.js, RESTful APIs, Bootstrap, responsive UI development.
- **Databases:** MySQL, MongoDB, SQLite, SQL, database design, CRUD operations.
- **Networking:** Computer Networks, TCP/IP, DNS, HTTP/HTTPS, network troubleshooting, network performance basics.
- **AI / ML:** NumPy, Pandas, OpenCV, ChatGPT, prompt engineering, Streamlit.
- **Tools & Collaboration:** Git, GitHub, Postman, Visual Studio Code.
- **Design:** Figma, UI/UX fundamentals, wireframing, responsive design, user-centered interfaces.
- **Core Strengths:** Data structures and algorithms (120+ LeetCode problems), advanced coding, problem solving, OOP, DBMS, operating systems, communication, basic software development, System Design Level 2.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer Intern (Oct 2024 – Jan 2025) | Y-Hills

- Developed feature-rich web applications using React.js, Node.js, Express.js, and MySQL, ensuring seamless interaction across frontend, backend, and database layers.
- Designed and integrated RESTful APIs, configured MongoDB storage solutions, and tested application workflows using Postman.
- Collaborated in Git-based code repositories and delivered solutions in an agile environment.

Summer Trainee – Cloud Computing (Jun 2025 – Jul 2025) | KodeZen Technologies

- Built a cloud platform focused on scalable data storage and efficient retrieval processes.
- Applied cloud application development concepts to structure data workflows with emphasis on availability and secure data management.

Summer Trainee – Robotics & Drone Making (Jul 2025 – Aug 2025) | CSVTU, Bhilai

- Engineered drone and robot prototypes using LDR sensors and embedded-systems coding; achieved an A+ grade.
- Programmed microcontrollers and integrated multiple hardware sensors.

KEY PROJECTS (END-TO-END IMPLEMENTATION)

Personal Portfolio: GitHub-hosted portfolio showcasing projects, technical skills, and development work. Access: https://github.com/harishrarma/PORTFOLIO

NASA Mission Control – Kepler Data Platform: Built a React.js and Node.js/Express full-stack platform for Kepler planet data and launch management, with REST APIs, MongoDB/local-storage modes, and Docker support.

E-Commerce Platform: Architected and implemented a full-stack e-commerce solution using the MERN stack, including functional RESTful endpoints for authentication, product catalog, cart management, and order processing.

Face Recognition Attendance System: Built a Python-based computer-vision application for facial recognition and registered-user identification, processing attendance automatically.

OneBanc Dashboard UI/UX Design: Designed a dashboard interface in Figma, focusing on clear layout, navigation, visual hierarchy, and user-friendly interaction design.

Weather Forecasting Application: Created a responsive React.js application consuming external REST APIs to deliver real-time weather data, supporting operational decision-making.

Ad Snap – AI-Powered Image Editing Platform: Developed a Python/Streamlit web application for product-focused promotional creatives, including product replacement, image enhancement, shadow extraction, and image upscaling.

TECHNICAL CERTIFICATIONS

Cisco Certifications: Cyber Security, IT Development, Networking, and Operating Systems.

Technical Workshops: AI, ChatGPT, and Prompt Engineering — completed through the Ben10 Workshop.

LEARNING & OTHER CERTIFICATES

Leadership & Volunteering: NSS Volunteer, Social Media Coordinator, and Event Leader, demonstrating communication, teamwork, organization, and event coordination. QCFI Certificate of Appreciation for contributions to the 16th Chapter Convention on Quality Concepts, Bhilai Chapter (Oct 2025).

EDUCATION

B.Tech. in Computer Science and Engineering | Shri Shankaracharya Technical Campus, Bhilai, Chhattisgarh

Aug 2023 – Present
